CSCI 101 includes reading/writing assignments in order to help meet the ABET accreditation criteria of training students to have “the ability to communicate effectively”. In this assignment, you are to read an article and then write responses to the following questions. Your written responses must be in your own words. Full credit is only possible for grammatically correct responses. Use appropriate citations for any source you use besides the paper listed below.

Brief History of the Internet
By Internet Society
1997

After reading the article listed above, answer the following questions. Your total response should be approximately a page, single spaced (typed).

1. (4 points) This article covers four distinct aspects of Internet history. Define them and discuss why each has been important to the evolution of the Internet.

2. (4 points) Discuss the first wide-area computer network built (when? where? who?) and what was learned from the experiment.

3. (2 points) Originally only TCP existed. Discuss why TCP was broken into two protocols (TCP and IP).

4. (3 points) When did the Internet officially begin? What happened on this date to launch the Internet? When was the term Internet adopted, and what was the effort called before then?

5. (2 points) In 1997, the authors stated, “One should not conclude that the Internet has not finished changing.” Do you think that statement is still true today? Justify your response.
