

Us:

We are The Giving Child Organization! We create innovative and exciting ways of giving children the opportunity to not only understand but to make a positive impact on the struggles their peers around the world face. Currently we are building a game app that will be sold on Google Play to raise money for *Heifer International*. Last year we had a team that built *Revolution: H2O* and this year we are looking for a team to work with us on either a continuation of *Revolution: H2O* or on our new game.

Our Goal:

To build a game for Android that we will sell in conjunction with *World Builders* annual fundraiser to raise money for *Heifer International* or to add several levels to our already existing game *Revolution: H2O*.

Logistics:

We will have weekly off-campus meetings/updates in Golden or in Denver but your actual work will take place in whatever venue you choose. We do not have official facilities and in truth we believe brilliance happens best outside of the office, not in an enclosed and rigid work environment.

Why You Want to Join Us:

We are small: Start out with us and as we grow, we will take you with us. Our plans do not end with apps, if you are into designing, gaming, building, coding or anything to do with games, our future is endless and we want you to join us!

Freedom: We have the dream, the connections, and this year we have an expert coder as a project manager! We need people who have the know-how. We will welcome your knowledge, advice and expertise and you will find us to be partners rather than dictators. We are looking for self motivated people in all varieties, animators, artists, coders, game designers and musicians.

Fun: This is going to be challenging but also a lot of fun. You will be able to give rise to your creative side and your problem solving skills will be on high alert. This will be collaboration at its best! And besides, we are building games for children, fun must be part of the process.

Appreciation: We will think you are awesome, amazing and incredible. We will be excited to see what you build and proud to have you working with us.

We will have yummy weekly meetings: We will feed you the best foods ever during our meetings!

We are going to change the world: Who wouldn't want to be part of that?
