Project Opportunity

- Build AI/ML algorithm for VC-backed Start-up
- Gain real-world skills in Artificial Intelligence
- Learn from Fulfilld's Head of AI (PhD in AI/ML)
- Fulfilld is fast-growing Colorado-based Startup
- Strong innovative, collaborative, and creative team
- Opportunity for future employment

Project Details

- **Objective:** Design, code, build bin-packing algorithm(s) accounting for multiple factors including weight, dimension, etc. to determine best packaging size and pack sequence.
- **Scenario:** A given order has five line items and various quantities – what box should I use and how should I load the product?
- **Project:** Identify how an employee should load sold products in most efficient order (1st, 2nd, etc.) along with proper amount of packaging material into a shipping box.
- **Language:** AI/ML Vertex AI development (code in Python)
- **Team:** Work w/ Fulfilld team led by Head of AI Ken Kennedy, PhD

My internship at Fulfilld was an invaluable experience that I am so incredibly appreciative of! Not only was I able to learn how software development is done in the real world, but I was also able to work alongside some amazing and inspiring programmers who showed me that creating clean and efficient code was something to strive for.

I loved the time I spend with Fulfilld, and it truly set me up for my career moving forward with all of the skills I learned, as well as how to find a workplace culture that I fit into that would allow me to thrive, like the one at Fulfilld.

**Cole Callihan, CS-Mines 2022 Intern
and CS-Mines Adjunct Professor**

Driving Real World ROI*

- Reduce Travel Time by 40%
- Increase Pick Efficiency by 50%
- Reduce Employee Ramp-up by 5 Days
- Reduce Inventory Planning by 80%
- Reduce Slotting Effort by 80%
- Increase Putaway Efficiency by 50%

*Estimated average metrics for typical Fulfilld customer.
Custom specific ROI dependent upon Customer scenario.

Core Features

Warehouse Management

Inventory Management

Slotting Optimization

Task Engine

ERP Integrated (SAP, Oracle, MS, Sage)

Machine Learning Decision Support

Features & Benefits

Cloud Based & Auto-Scaling

Digital Twin Ready

Software & Hardware Included

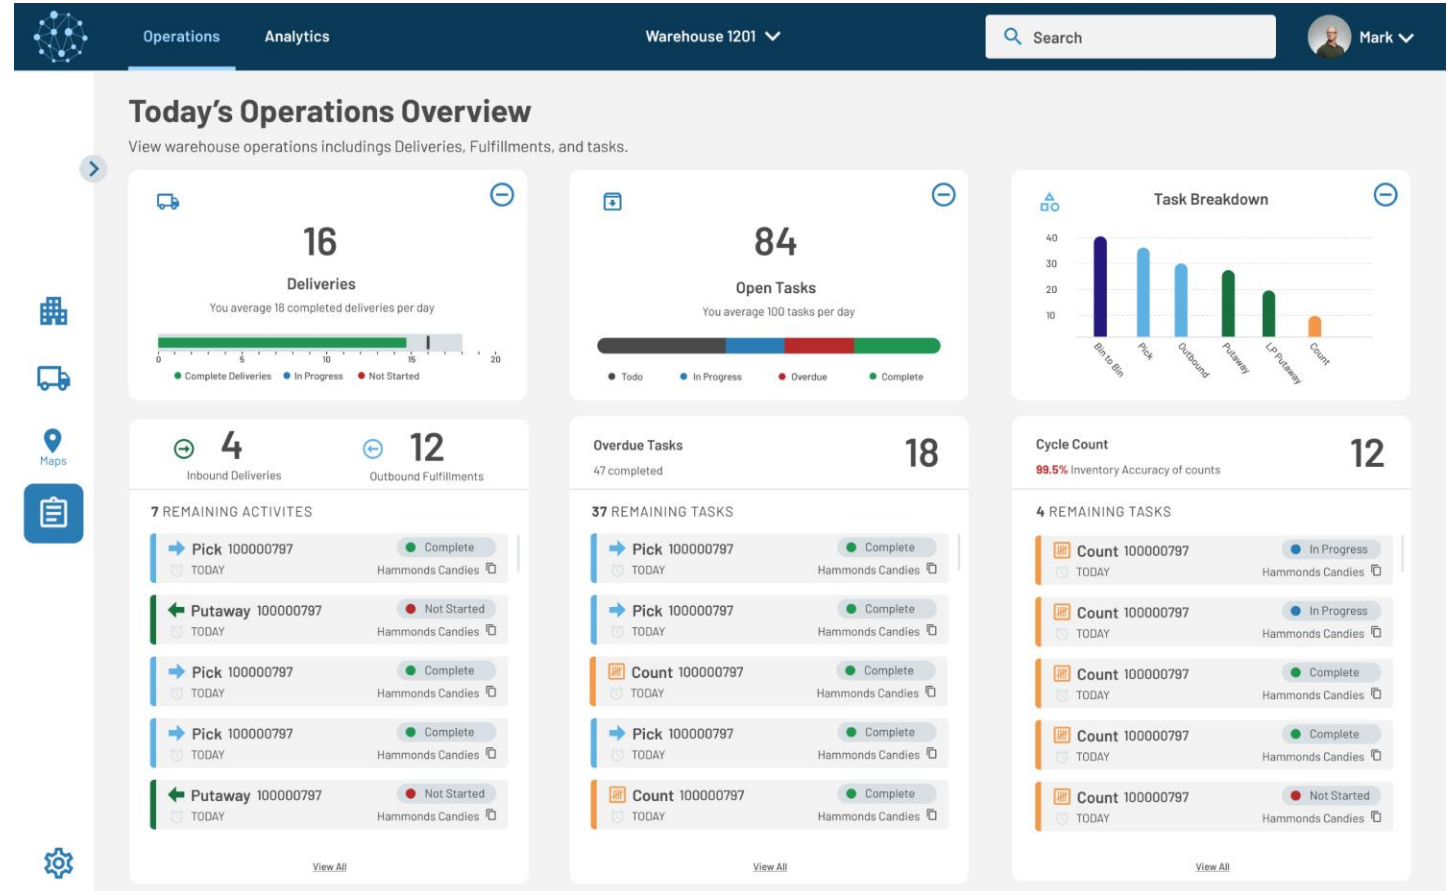

Low Total Cost of Ownership

Module based

Real-time APIs to ERP

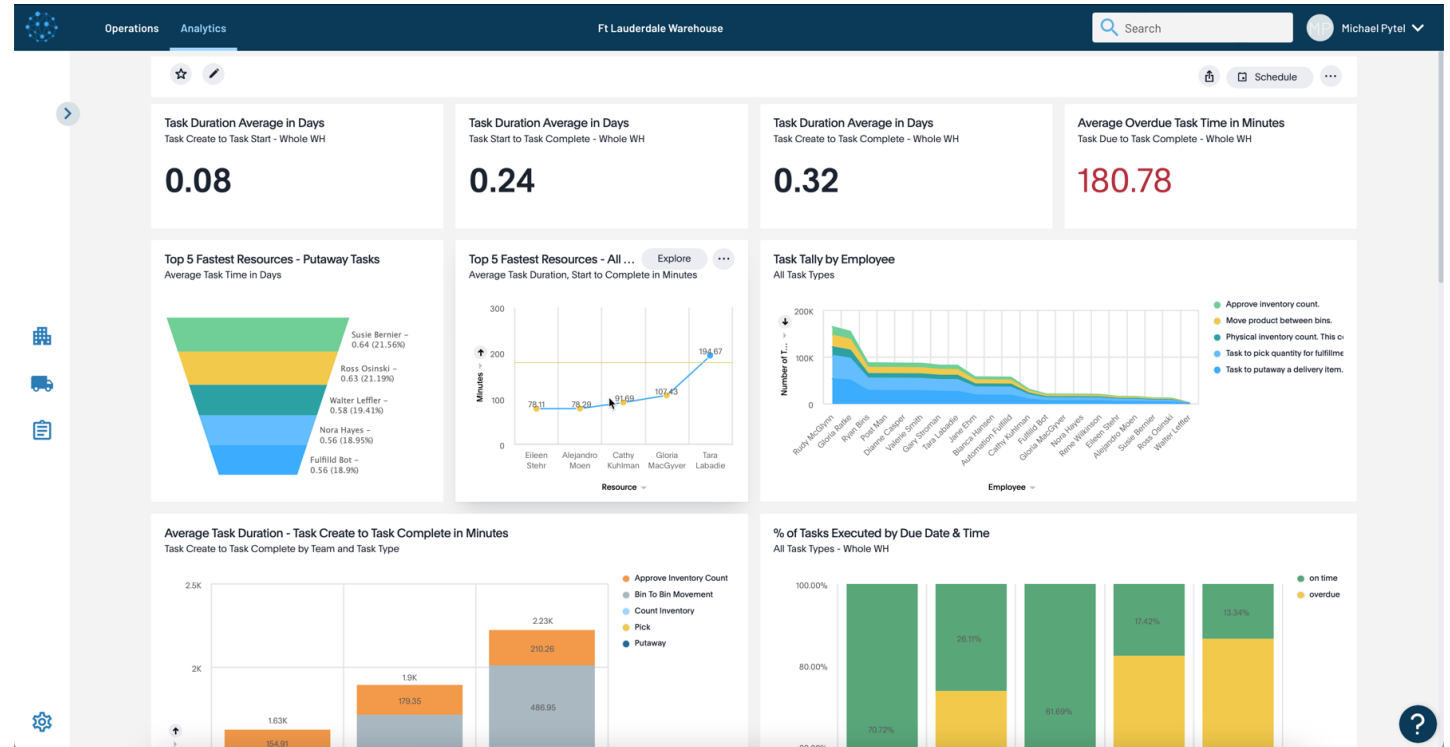

Web Application

- User:
 - Warehouse Management
 - Leadership (CFO, CIO, VP, etc.)
- Highlights:
 - Operational Dashboards
 - Manage by Exception
 - System-recommended Approving
 - Heat-Mapping
 - Embedded Analytics
 - Master Configuration

Advanced Analytics

- User:
 - Warehouse Management
 - Inventory Control
 - Continuous Improvement
 - Leadership (CFO, CIO, VP, etc.)
- Highlights:
 - Analytic Dashboards
 - Automated Insights
 - Modify Dashboards
 - Export & Share
 - Independent Data Exploration

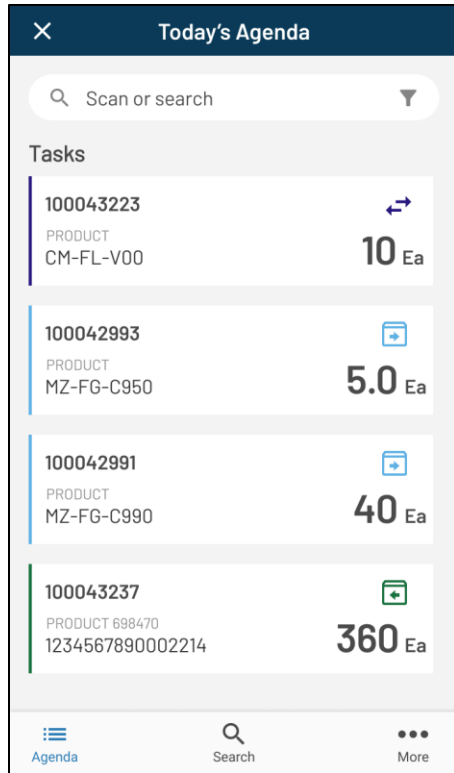

Mobile Application

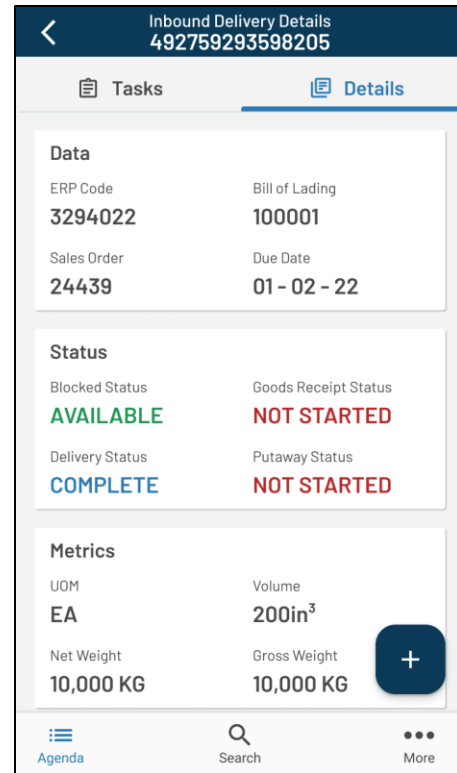

- User:
 - Warehouse Worker
- Highlights:
 - Can be deployed on existing Scanners
 - Intuitive consumer-grade UI
 - Prioritized agenda
 - Real-time system directed tasking
 - Digital Assistant (“Hey Phil...”)
 - Route guidance
 - Location aware

Location Based Task Assignment

Tasks Organized By Location & Priority

Tasks for Each Movement

Natural language guidance

Turn-by-turn navigation
