

Swim Stroke Visualization

Swim Tech LLC

About US

Swim Tech LLC is a water sports company working to provide accessibility to top tier swim education through process, and technology.

The Project

We are looking to continue development on our stroke visualization software. The work will be directed toward building computer vision models to track and identify movements and rigid bodies.

Skill Sets

The following skills might give you a head start on this project:

- Computer Vision/Augmented Reality
- Manipulating Video files
- Simulation and modeling

Logistics

- The ideal team size is 3-4 people and meetings can be held at Mines or remotely.
- For this project, you will be asked to assign intellectual property rights.
- There is potential for internship or part time work at the end of this project
