

Workflow Planner

Swim Tech LLC

About US

Swim Tech LLC is a water sports company working to provide accessibility to top tier swim education through process, and technology.

The Project

We are looking to provide a full stack development opportunity. This Team will work on a workflow feature we want to add to our software product. The work will be directed toward building a full stack web-based application.

Skill Sets

The following skills might give you a head start on this project:

- Django, Vue, React or another web framework.
- Full Stack Development

Logistics

- The ideal team size is 3-4 people and meetings can be held at Mines or remotely.
- For this project, you will be asked to assign intellectual property rights.
- There is potential for internship or part time work at the end of this project
