Project Proposal

Develop iOS App for Daily Prayer and Self Awareness Tracker

Client

David Aungst, Road to Purity Inc.

Project Background

Road to Purity is a Catholic non-profit organization dedicated to helping individuals overcome addiction through an integrated approach of science, psychology, and faith. The organization focuses primarily on purity and offers various programs including books, courses, support groups, and educational materials.

Project Overview

The project involves developing an iOS application to digitize Road to Purity's Daily Action Planner from the book Winning the Battle. The app will serve as a digital companion for users undertaking the recovery journey, allowing them to:

- Track daily activities and emotional states
- Receive timely reminders and notifications
- Monitor progress throughout the program
- Access encouraging messages and support

Student Requirements

Core technical skills and responsibilities include:

- iOS development experience or willingness to learn
- Database design and implementation
- UI/UX design capabilities
- Experience with notification systems
- Basic understanding of user authentication systems (optional)

Team: 3-4 Students

Location: Anwhere

Student Benefits

This project offers students valuable real-world experience in:

- Developing a complete mobile application from concept to deployment
- Working with a non-profit organization on a meaningful social impact project

- Gaining practical experience in user-centered design
- Understanding privacy and security considerations in healthcare-adjacent applications
- Potential exposure to cross-platform development (Android version if time permits)

Internship Possibilities

Road to Purity is a non-profit that relies on donations and as such funding varies. If funding is available we would greatly welcome interns.
