

## **Project: DtD - Distillery to Distillery**

### **Company Background**

Method & Muse Spirits' is an Arvada distillery cocktail lounge for handcrafted cocktails and seasonal events in Olde Town Arvada. Aubrey Winger the CEO is also a Teaching Associate Professor at the Colorado School of Mines.

### **Problem**

Distilleries in the US desperately need a centralized platform for facilitating the transfer of spirits between craft distilleries so that each distillery can sell, and/or use in cocktails, the amazing spirits produced in small facilities across the US. The current distribution system doesn't easily facilitate these transfers, so it's time to rectify that this summer!

### **Project Scope**

Develop a website that will serve as the centralized platform to facilitate the transfer of spirits between craft distilleries. At a minimum, the website will require login authentication, company profile information, spirit information, image sharing, search capabilities, etc.

### **Recommended Skills**

- JavaScript and/or TypeScript
- Python or other scripting languages
- basic web technologies (HTML, CSS, DOM, browser storage, HTTP requests)
- familiarity with browser developer tools
- UI/UX design for technical tools
- structured data handling
