

**ATTN:** Kathleen Kelly

**Project Title:** Robocall and Spam Call Blocking App

**Preferred Team Size:** 3-4 students

**Work Location:** Remote / Flexible

**NDA Required:** No

**Project Summary:**

Develop a mobile application for both Android (Google Play) and iOS (Apple App Store) that helps users automatically block robocalls and spam calls.

The app should be simple, reliable, and easy to use. Its main purpose is to identify and prevent unwanted calls before they reach the user. The ideal user is elderly or individuals who may be at higher risk of scams or hacking.

**Core Features:** Automatic detection and blocking of known spam and robocalls

AI-based detection that analyzes call patterns SMS spam filtering

Custom settings (block unknown numbers, allow contacts only, etc.)

**Technical Expectations:**

Available for Android and iOS. Clean and efficient performance with minimal effort or technological knowledge required. Secure handling of user data with little to no ads.
